NOTE. Data based on twelve monthly samples during 2000. For information on confidentiality protection sampling error nonsampling error and definitions see http://factfinder.census.gov/home/en/datanotes/exp_c2ss.html.

The Census 2000 Supplementary Survey universe is limited to the household population and excludes the population living in institutions college dormitories and other group quarters. Data are based on a sample and are subject to sampling

The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.

NOTE. Data based on twelve monthly samples during 2000. For information on confidentiality protection sampling error nonsampling error and definitions see http://factfinder.census.gov/home/en/datanotes/exp_c2ss.html.

The Census 2000 Supplementary Survey universe is limited to the household population and excludes the population living in institutions college dormitories and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of The number of householders does not necessarily equal the number of households because of differences in the weighting schemes for the population and occupied housing units.

Employment and unemployment estimates may vary from the official labor force data released by the Bureau of Labor Statistics because of differences in survey design and data collection.

Free or reduced price school meal benefits figures only include households with children under 18 years.

The Census 2000 Supplementary Survey universe is limited to the household population and excludes the population living in institutions college dormitories and other group quarters. Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate is represented through the use of a confidence interval. The confidence interval computed here is a 90 percent confidence.

An '*****' entry in the lower and upper bound columns indicates that the estimate is controlled. A statistical test is not appropriate.
